The Django Toolbox

everybody needs these

Lay of the land

What to expect in this

Step 1

Make a blogging app

Step 2

Writing some content

Step 3

Maybe we need some new fields

Database Changes...

Road to Recovery

Not to be confused with the highway to hell

south

http://south.aeracode.org/

Project Mayhem

His name was schemamigration

Don't worry...

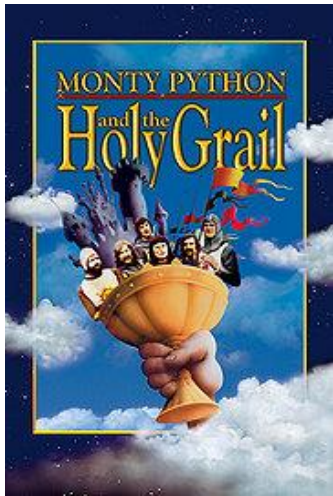
we'll do a live demo soon...

Beyond Basics

Because we've all got our corner cases

And there was

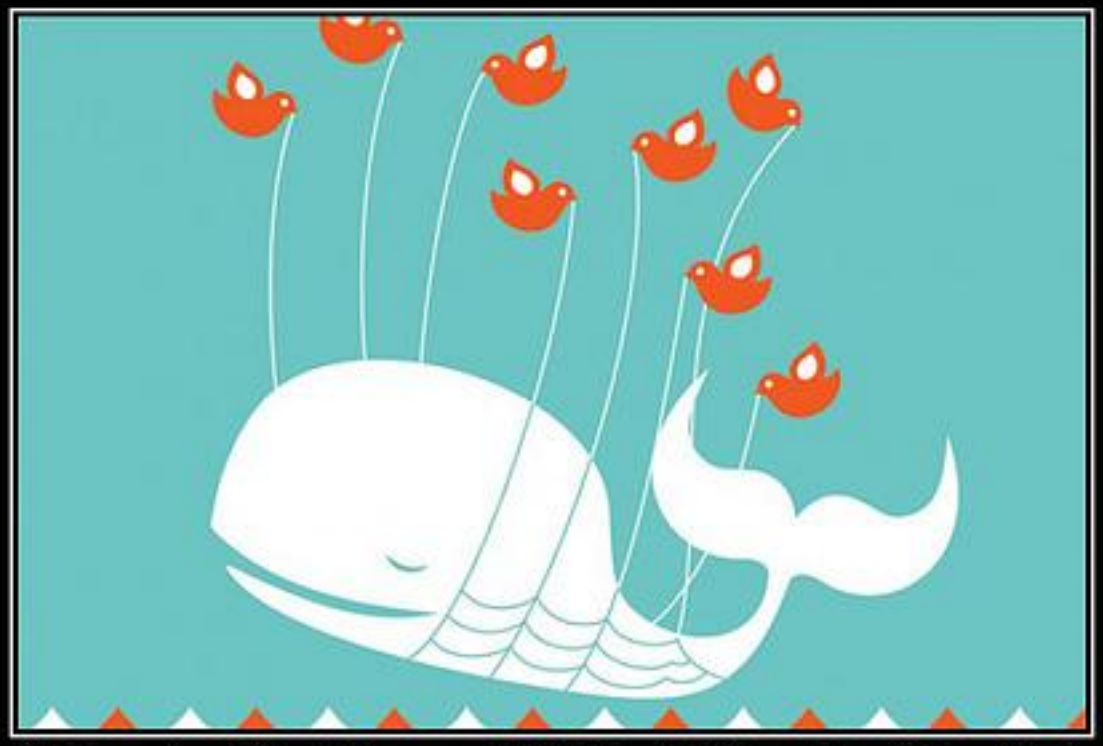
much joy and rejoicing, and the quest for the holy grail could now continue



Pesky Templates

Debugging with printline

500...



FAIL WHALE

Twitter: Failure is an option. At least once a day, or whenever you need it.

HTTP://MODADIMAGNO.BLOGSPOT.COM

DEVIDESPAIR.COM

A better way

There has to be one

https://github.com/django-debug-toolbar/django-debug-toolbar

Crushing the Context

And the SQL, headers, settings, signals, etc.

Live Demo

Part Deux

djangopony

Magic that can't be removed.

Problem Solved

Take a ReST

Make the backend boring

Yo Dawg

Heard you like javascript

Libraries Everywhere

Piston

Tastypie django-rest-framework

Javascript

jQuery
YUI
Backbone
Marionette JS
Ember
Angular

Final Demo
